OneHealth Initiative
kkm@onehealthinitiative.com

2nd July 2015

Dear colleagues,

We have been approached by our friends in the American Academy of Family Physicians, one of our Member Organizations, to consider adding our support to the OneHealth Initiative.

I am please to say that the WONCA Executive has happily endorsed this recommendation, and I am now writing to confirm the support of WONCA – the World Organization of Family doctors – for your cause.

WONCA recognises that in the 21st century the world faces increasing challenges from emerging diseases and transmission across species. It is vital that all health professionals – both human and animal – work ever-more-closely together in joint research and education, for the greater public health good, and we are pleased to lend support to the work of your enterprise.

With our best regards.

Dr Garth Manning
Chief Executive Officer
